

Combining Livability and Luxury in a Highly Personalized Style

Your home's purpose should go beyond providing shelter for you and your loved ones. **Home is your sanctuary - your safe place in which you can be completely you.** So shouldn't you infuse your surroundings with items that are a true reflection of you and your lifestyle?

An eclectic style means choosing the best mix of different styles. *I don't think anyone really fits into one box,* says Kathy Anderson, owner and principal designer at Eklektik Interiors. *The most interesting people have many facets to their personality. As a designer I love to tap into that to create a unique look that sets my clients apart.*

"Eklektik isn't just a name,"
says Anderson,
"Our clients are never going to
go to someone else's house
and see the same thing."

When each room is designed with purpose and function, usability and ease of living increases.

Surrounding yourself with items that bring out your best self inspires exceptional living. *Design is the fuel that feeds my soul - and I hope my design, in turn, feeds the soul of every client we serve,* says Anderson.

You can live luxuriously, not based on a budget, but based on things that put a smile on your face. On any budget you can find unique accessories, sculptures, and art that make a statement and add a luxurious feel to a room.

You can take a look you love and make it your own by adding something completely different, your personal signature to a room. Inspiration comes in

many forms, and for the creative design team at Eklektik Interiors, inspiration is most especially found in the clients themselves. *We work really hard at what we do,* says Anderson. *We're a collaborative team that brings a wide range of skill sets and experiences to the table, and this means that unique, one-of-a-kind design isn't just our strength, it's what drives and defines us.*
