TEXAS **FACES** of DESIGN
A CONVERSATION ON COLOR

EKLEKTIK INTERIORS

Like an old song that instantly transports you back to the past or an aroma that you associate with a cherished memory, color can evoke an intimate connection to the senses. In design we often use a simple understanding of color's warmth or coolness to add or subtract attention to a space, either enhancing or reducing an emotional reaction. We love working with our clients, most of whom are not timid in their color preferences and are willing to have a long-term relationship with a palette that really speaks to their personality and style.

Eklektik's Colorful Personalities:

Kelly & Stephanie: Blush- Soft and sophisticated, yet vibrant when used with white in a sunny room.

John & Emily: Blue- From dark navy to the palest of robin's egg, blue evokes the most tranquil mood.

Kathy & Peggy: Green- Green is so versatile. Sumptuous emerald fabrics or hunter green lacquer with gold accents will set the tone of power and success.

Regina & Cristine: Purple- The color of royalty, purple is luxurious, especially in a heavy plush velvet or a Dupioni Silk from India.
